

WebFX, Inc. Donates Services to Non-profit Organization, Medical Support International, Inc. (MSI)

Garden Grove, CA September 18, 2006 – Medical Support International, a Mission Viejo, California-based non-profit organization providing world-wide humanitarian aid launched its updated site on August 1, 2006 from WebFX, a full-service professional web design and development firm located in Garden Grove, Calif. The updated site now allows users to make donations directly from the site, subscribe to receive newsletters, and a content management system to keep the site current.

WebFX worked with Medical Support International on ways that they could improve their web presence in order to become more efficient at their goals of providing world-wide aid to pain and suffering. The first goal of the project was to implement a cost-effective means for users to make donations directly from the site. WebFX implemented the PayPal™ Donation System, which allowed an easy web integration solution with quick startup time. Medical Support International also benefited from the backend development services that WebFX has become renowned for, with the addition of the WebFX SiteDirector content management system so that they can easily update critical information regularly to keep content accurate.

Lastly, WebFX provided its web-based e-newsletter solution (WebFX MailStudio) that allows Medical Support International to keep users and donation members updated on current events and volunteer efforts. A subscription form was implemented on pages throughout the site allowing users to quickly and easily subscribe.

Because of Medical Support International's limited budgets and WebFX being a supporter of the cause to help others in need, WebFX jumped at the opportunity to donate website services to help get the word out to donors and recipients alike. WebFX is committed to making every effort to increase Medical Support International's exposure on the Internet through reliable web hosting and web-based tools.

About Medical Support International

As a non-profit humanitarian aid organization, MSI comprised of volunteers whose sole motivation is to help bring an end to world wide suffering and pain. Focused on multiple health care and related humanitarian projects, MSI is working at an ever increasing pace to provide support mechanisms to those that need it the most.
