

# Thank you

## for downloading this freebie!

Should you have any questions, please don't hesitate to contact me via [mikolaj@podlasek.eu](mailto:mikolaj@podlasek.eu)

## What you get

A pack of mockup awesomeness!

- **objects and mockups (PSD)**
  - two notepad mockups - you can copy-and-paste your work into smart layers and they get transferred to the media below
  - ten objects to spice up your presentation (calligraphy pen, nibs, ink bottles, and a pencil )
- **scene maker (PSD)**
  - this file contains:
    - lighting (nothing fancy, just a vignette, feel free to experiment with different adjustment layers)
    - shadow settings– you can change global lighting to change **all** the shadows in the scene! It's all dynamic, no hardwired shadows anymore.
    - background

All objects have a special **shadows** layer group. They cast double shadows that are dynamic. Please don't fiddle with these, unless you know what you are doing.

## If you like this freebie, there's more!

Check out the full version with more mockups, 60+ items, 10 backgrounds and more to come with free, lifetime upgrades!

Check it out on Creative Market (you will find a showcase video there, too):
